

PRESS RELEASE

Lumens Integrates Extron Control System with Its PTZ Cameras

Hsinchu, Taiwan, April 16th, 2020 – Lumens® Digital Optics Inc., today announced its UHD and Full HD PTZ cameras have successfully integrated with Extron control systems, the world-leading manufacturer for A/V control systems. Lumens strives to simplify the integration workflows and provide a new level of convenience with Pro A/V solutions.

Lumens PTZ cameras combined with the Extron IPCP, IPL and TLC series controller via RS232 and Ethernet. The powerful control drivers enable the Extron Touch Screen and the Extron App to fully manage the camera control directly, such as Pan-Tilt-Zoom, preset and focus functions. With seamless integration, users can control white balance and exposure easily. The system works with the VC-A70H 4K PTZ camera and the VC-B30U USB 3.0 PTZ camera. Also, it is compatible with the VC-A50P IP PTZ camera, the VC-A50PN IP PTZ camera with NDI®, and the VC-A61P UHD PTZ IP camera.

The integration allows a better experience and a more efficient connection for users. It is applicable for several vertical markets such as education, broadcasting, government, house of worship, medical, entertainment, etc.

Availability

Download and search the Extron controller system drivers from the Extron webpage:
