Quick Installation Guide

www.MyLumens.com

Lumens®

4. Virtual USB Network Camera

OIP-N60D can convert IP signal source into USB (UVC) for seamless integration with video conferencing platforms.

4.1 Connection Method

- Connect the OIP-N60D to LAN
- Connect the computer to the OIP-N60D using USB-C cable

Note:

The computer connects to the OIP-N60D via USB-C and uses the RTSP/NDI source as USB network camera

4.2 Webpage Settings

- [System] > [Output], open [Virtual USB Setting]
- [Source] > [Search new Source] > Select the desired output device > Click [Play] to output device signal source

4.3 USB Camera Screen Output

- Launch a video software like Skype, Zoom, Microsoft Teams, or other similar software
 - Choose the video source, to output USB network camera images
- * Video Source Name: Lumens OIP-N60D / Lumens OIP-N60D, Dante AV-H

5. USB Network Camera Extension (OIP-N40E Required)

When used with the OIP Bridge, it can extend the range of USB network cameras through the network to improve installation flexibility.

5.1 Connection Method

- Connect the OIP Bridge to the local network
- Connect the USB camera to the OIP-N60D using USB-A cable

- Connect the monitor to the OIP-N60D using HDMI cable
- Connect the computer to the OIP-N40E using USB-C cable

Note:

- (1) Computers can use USB-C to connect to OIP-N40E and use USB network camera
- (2) Computers can project images onto a TV through a USB-C connection to OIP-N40E

5.2 OIP-N60D Webpage Settings

[System] > [Output], open [USB Extender]

5.3 OIP-N40E Webpage Settings

- [System] > [Output] > [Extender Source List]
- [Search new Source] > Click [Available] to select OIP-N60D > Connection displays [Connected]

5.4 USB Camera Screen Output

- Launch a video software like Skype, Zoom or Microsoft Teams, or other similar software
- Choose the video source, to output USB camera images

*Video Source Name: Select according to the USB Camera
