Chapter 1 Package Contents

2.1 I/O functions Introduction

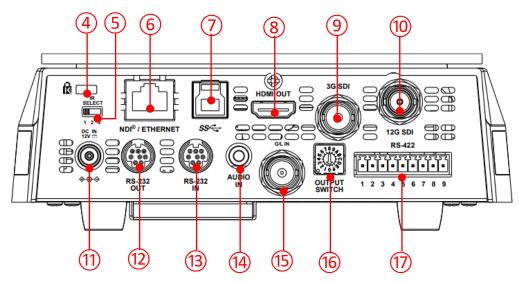

2.1.1 Front View

NO.	Item	Function Descriptions
1.	Tally Lamp	Displaying the Tally Lamp status of the camera
2.	Camera lens	30x HD camera lens
3.	Power/Standby LED indicator	Displaying the status of the camera, please refer to <u>2.2</u> <u>Description of LED indicator</u>

Lumens®

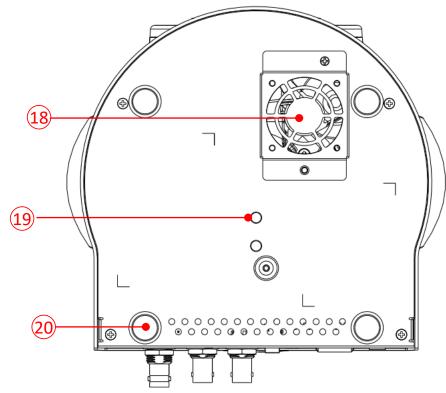

2.1.2 Back View

NO.	Item	Function Descriptions
4	Kensington lock hole	Safety lock slot
5	IR SELECT	The remote control ID setting is only controlled after corresponding to the Camera Select on the remote control
6	Network port	Network port supports routers or hubs of PoE++ (IEEE802.3bt) with power supply
7	USB 3.0 port	The USB port is for connecting to the USB port of the computer and providing USB signal images <remark> Support up to 3840 x 2160/29.97p</remark>
8	HDMI 2.0 output	HDMI 2.0 output (Audio output supported)
9	3G-SDI output	3G-SDI output(Audio output supported)
10	12G-SDI output	12G-SDI output (Audio output supported)
11	DC 12V power connector	AC power supply connecting port
12	RS-232 output	RS-232 output port, at most 7 cameras can be connected in a serial connection
13	RS-232 input	RS-232 input port, at most 7 cameras can be connected in a serial connection
14	Audio input	Support Line In/Mic In
15	G/ L IN	SDI Synchronous Source Input
16	OUTPUT SWITCH	Adjust the resolution setting. The default is 3840 x 2160/59.94p
17	RS-422 port	RS-422 connecting port, at most 7 cameras can be connected in a serial connection

Lumens®

2.1.3 Bottom

NO.	Item	Function Descriptions
18	Mute cooling fan	The cooling fan automatically controls its rotation speed and performs cooling in cope with the operation temperature of the machine
19	Tripod lock hole	The camera is mounted on a (specification) 1/4"-20 UNC tripod
20	Rotatable foot pad	When using the metal plates of accessories, remove 4 pieces of rotatable food pads on the bottom by rotating counterclockwise, and then install the mental plates

2.2 Description of LED indicator

Status	Power	Standby	
Startup in progress (initialization)	Green light	Orange light	
In use	Green light	No indicator	
In standby mode	No indicator	Orange light	

2.3 Tally Lamp Function Description

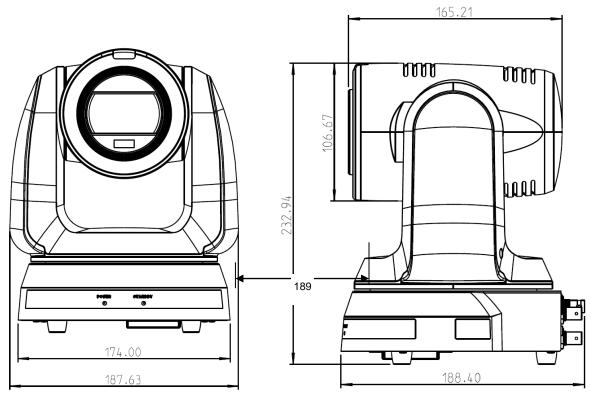

The Tally lamp function may be enabled through the RS232 command. Please refer to RS-232 command set document

3.1 Camera Size

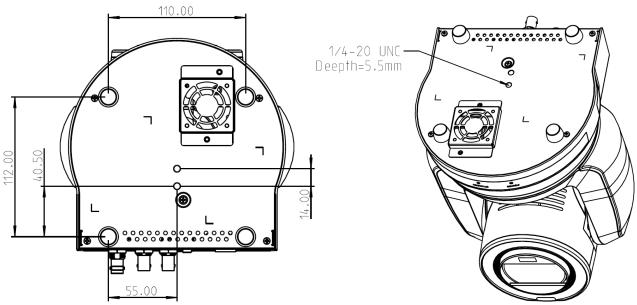

3.1.1 Camera Front View and Side View

- Length x Width x Height: 232 x 188 x 189 mm
- Weight: 3.0 Kg (without mental plates)

3.1.1.1 Camera Bottom View

The camera can be mounted on a 1/4"-20 UNC PTZ tripod deck by using the lock holes on the bottom for the tripod

3.2 Preparation before installation

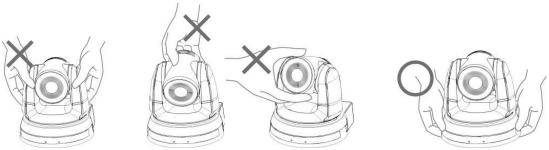

Installation and connection of HD camera requires special skills. To install by yourself, please follow necessary steps, ensure steady and tight installation of the device, and pay attention to your safety to avoid any accident.

- **3.2.1** Ensure the safety of the installation environment. Please do not install the device on unstable ceiling or in a place where the device is in danger of falling to avoid any accident.
- **3.2.2** Please check whether accessories in the box are complete or not. Please contact the supplier for any shortage, and make sure to keep the accessories in the box intact.
- **3.2.3** Please choose a proper place for installation of camera in advance. Please determine an installation place according to the following requirements
 - 3.2.3.1 Confirm the position for the object to be captured.
 - 3.2.3.2 Confirm whether the camera is set at a proper distance from other light sources.

3.3 Instruction for installation

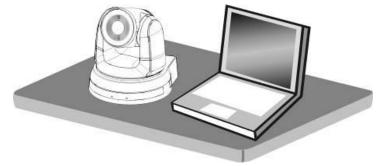

3.3.1 Install the camera on the desk

- 3.3.1.1 Precautions for installation
 - Please install the machine on a flat desk
 - Do not grab the camera head by hand when handling the device
 - Do not rotate the camera head by hand. Improper rotation may result in breakdown of the camera

3.3.1.2 Installation steps

Please place the camera on a flat desk to ensure the normal vertical and horizontal operation of the machine and the good cooling of the fan at the bottom

3.3.2 I would like to install the camera on the ceiling

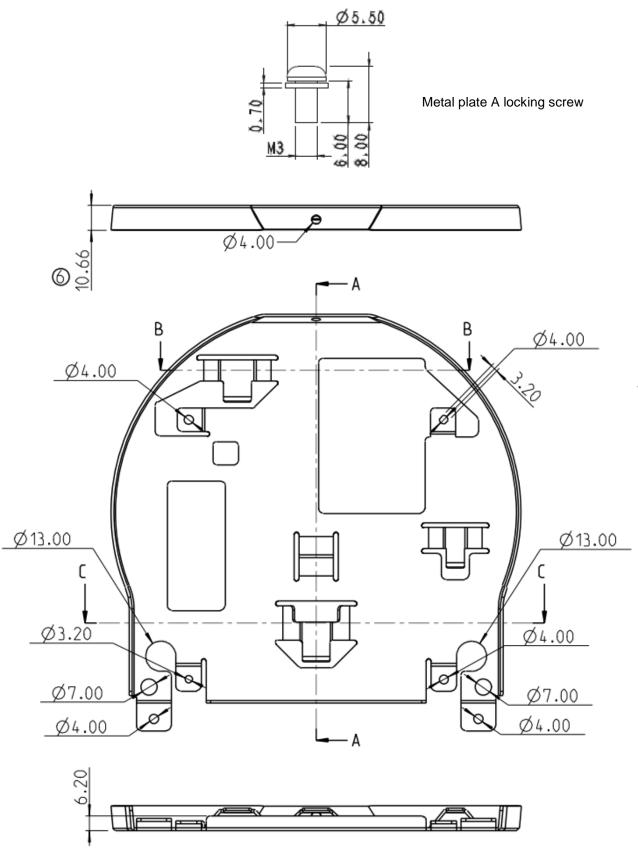

3.3.2.1 Prepare for the parts and equipment required during the installation

- Accessories in the box (metal plates A, B, M3 screw silver x 8, black x 2)
- Screw for locking on ceiling mounted hanger x 4
- Drilling machine, screw driver, ladder

3.3.2.2 Metal Plate size diagram

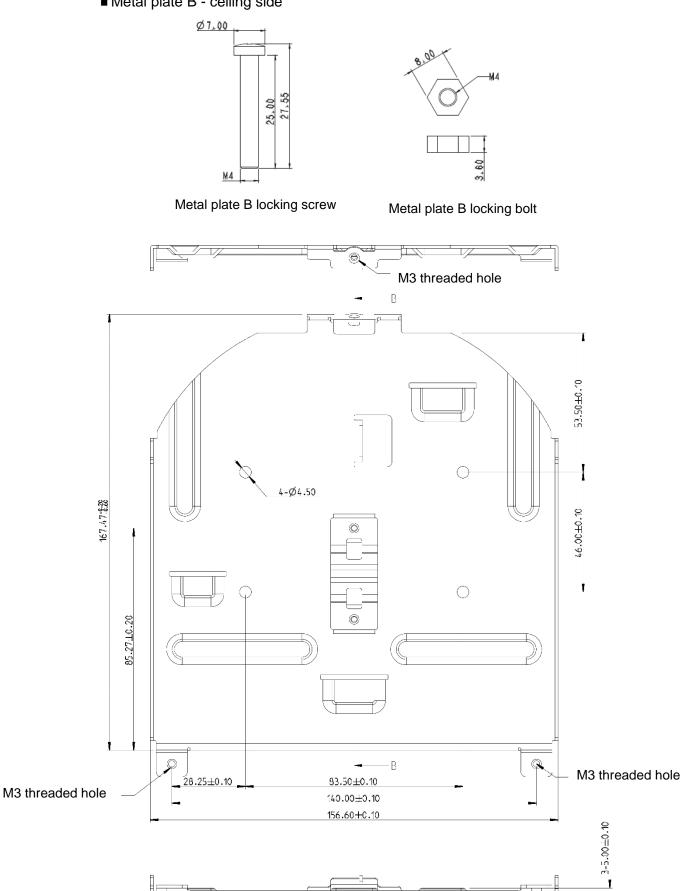

Metal plate A - machine side

Metal plate A - machine side

Metal plate B - ceiling side

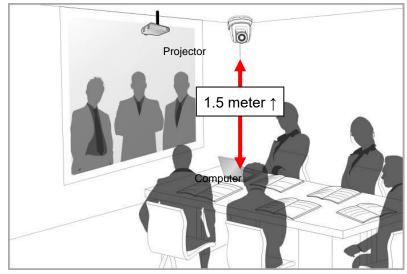

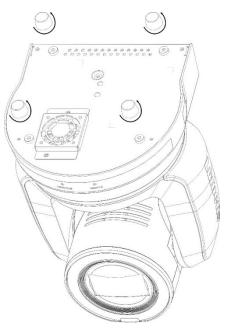

ı

- 3.3.2.3 Precautions for installation
 - 1. Before installation, please confirm the orientation of the machine relative to the object to be captured
 - 2. It is recommended that the machine should be set at a distance of more than 1.5 meter away from the object to be captured. Please adjust for a best distance according to the magnification of the lens

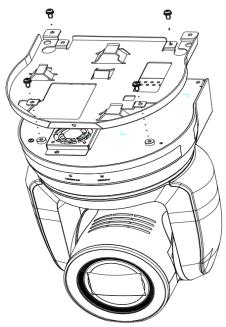

- 3. The machine (including metal plates) is weighed at about 3 kg. If it is to be installed on the ceiling, please use the hanger that has obtained UL security approval to prevent the machine from falling down.
- 4. Please check whether the camera is installed securely on a regular basis.
- 5. Please clean the cooling fan located at the bottom to ensure the good heat dissipation effect of the machine on a regular basis.
- 3.3.2.4 Installation steps
 - Remove the 4 foot pads on the machine base. The foot pads are designed to be detachable and can be removed by rotating them counterclockwise by hand.
 Remark> The removed foot pads must be kept properly for future use.

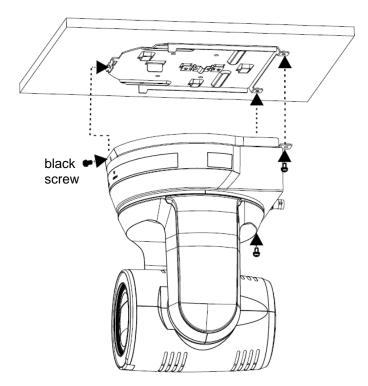

2. Fix the metal plate A on the machine base with 4 M3 silver screws

3. Lock the metal plate B on ceiling mounted hanger

<Note>

- (1) Please use the hanger that has obtained UL security approval
- (2) Please reserve the hole for the connecting wires of the camera
- 4. Combine the metal plate A and the metal plate B
 - (1) Push the metal plate A up to the ceiling and then to the right to latch the metal plate B
 - (2) And then secure with 2 M3 silver screws and 1 M3 black screw

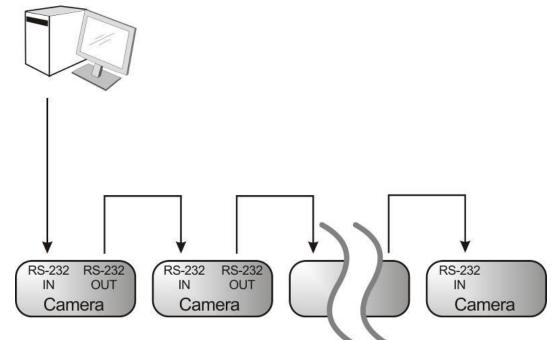

3.3.2.5 How to remove

- 1. Remove the connecting wires from the camera
- 2. Uninstall the camera together with the ceiling, loosen the three screws that fix the metal plates A and B and push to the left to remove the machine
- 3. Then remove the screws on the hanger and the machine

3.4 Connecting devices

3.4.1 RS-232 Connection

With RS-232 in/out, at most 7 Lumens cameras can be connected.

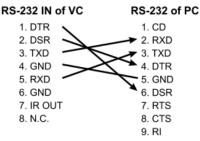

RS-232 pins definition instructions

4.2 Setting Menu

<Remark> Press [MENU] on the remote control to enter the setting menu; the **bold underlined** values in the following table are defaults.

1 st Level Major Items	2 nd Level Minor Items	3 rd Level Adjustment Values	Function Descriptions
	Mode	 Full Auto Shutter Pri Iris Pri Manual 	Exposure mode setting
	Exposure Comp	On / Off	AE Level
	Exposure Comp. Level	-5~ C ~5	The value can be adjusted after <i>Exposure Comp.</i> is activated
	Spot Light	On / <u>Off</u>	
	Spot Light Position	X(0~6)Y(0~4)	The value can be adjusted after Spot Light is activated
Exposure	Shutter Pri	1/10000-1/1	Adjustable when the <i>Exposure mode</i> is set to <i>Shutter Pri</i>
	Iris Pri	F1.6~ <u>C</u> ~F18/Off	Adjustable when the <i>Exposure mode</i> is set to <i>Iris Pri</i>
	Manual Gain	<u>0</u> -45dB	Adjustable when the <i>Exposure mode</i> is set to <i>Manual</i>
	Manual Speed	1/10000-1/1	Manually set the shutter
	Manual Iris	F1.6~ <u>C</u> ~F18/Off	Manually set the iris
	Gain Limit	9- <u>45</u> dB	Max. limit value of electron gain
	Iris Limit	<u>F2.2</u> -F11	Max. limit value of iris
	WDR	<u>Off</u> /1/2/	
White Balance	Mode	 Auto Indoor Outdoor One Push WB ATW Manual Sodium Lamp 3000K 4300K 5000K 6500K 8000K 	Select the color temperature mode 1. 4000k ~ 7000k 2. 3200k 3. 5800k 4. 1700k ~ 10000k 5. 1700k ~ 10000k 6. Custom 7. 2800k
	One Push Trigger	ENTER	One push trigger
	Manual Red	0~ C ~128	Adjustable when the white balance mode is set to <i>Manual</i>
	Manual Blue	0~ <u>C</u> ~128	Adjustable when the white balance mode is set to <i>Manual</i>
	Picture effect	OFF / Neg / B&W	
	Sharpness	0~ <u>C</u> ~14	
	2D NR	Off / <u>1</u> / 2 / 3	
	3D NR	Off / Low / <u>Typical</u> / Highest	
Picture	Image Mode	Default/Custom	The user may customize his/her desired image mode
	Image Mode Load	ENTER	Adjustable when the <i>Image mode</i> is set to <i>Custom</i> . After selected, the corresponding <i>Image mode</i> parameters will be read and applied to <i>Custom</i>
	Brightness	0~ C ~15	Adjustable when the <i>Image mode</i> is set to <i>Custom</i>

1 st Level Major Items	2 nd Level Minor Items	3 rd Level Adjustment Values	Function Descriptions
	Hue	0~ <u>C</u> ~15	Adjustable when the <i>Image mode</i> is set to <i>Custom</i>
	Saturation	0~ <u>C</u> ~15	Adjustable when the <i>Image mode</i> is set to <i>Custom</i>
	Gamma	0~ <u>C</u> ~3	Adjustable when the <i>Image mode</i> is set to <i>Custom</i>
	Pan/Tilt Limit	On / <u>Off</u>	Turn on/off the angle limit setting
	Pan Right Limit	0~ <u>170</u>	Limit the right angle
	Pan Left Limit	<u>-170</u> ~0	Limit the left angle
	Tilt UP Limit	0~ <u>90</u>	Limit the upward angle
	Tilt Down Limit	-30 ~0	Limit the downward angle
	Pan Flip	On / Off	Activate the reverse Pan direction
	Tilt Flip	On / <u>Off</u>	Activate the reverse Tilt direction
Pan Tilt Zoom	Preset Speed	5/ 25/ 50/ 80/ 120/ <u>160</u> / 200/ 300 deg/sec	Set the rotation speed of the cradle head when Preset is performed
	PTZ Speed Comp	On / <u>Off</u>	Set the Pan/Tilt moving speed to vary from the zoom position
	D-Zoom Limit	<u>x1</u> ~x12	Set the D-zoom limit
	PTZ Motion Sync	On / <u>Off</u>	When activated, PTZ synchronization can be achieved by controlling with the Presets < Remark> Refer to the Preset speed setting for this feature. The speed may be adjusted automatically due to the difference of PTZ moving range.
D-Effect	Mirror	OFF / Mirror / Flip / Mirror + Flip	Set the mode at which the image is mirror or flipped
	AF Sensitivity	Low / <u>Mid</u> / High	For AF triggering speed, the higher the speed is, the faster AF is triggered
	AF Frame	Center Area / All Area / <u>Auto</u>	AF frame setting, when central area was set as AF frame, focusing will be on the center of the screen. When Full Frame was set as AF frame, focusing will be calculated based on the full screen
Auto Focus	Zoom Tracking	Manual / <u>Curve Tracing</u> / Zoom Tracking	The focus mode during lens zooming (It can be set in the Manual Focus (MF) mode)
	PTZ Assist	On / <u>Off</u>	When PTZ Assist is enabled and PTZ control is in operation, the focus performs only once upon immediate execution. The focus will not be triggered afterward when the scene changes (It can be set in the Manual Focus (MF) mode)
	SMART AF	On / <u>Off</u>	Turn on this function and AF will mainly focus on the face
Ethernet	DHCP	<u>On</u> / Off	Enable/Disable DHCP setting using left and right arrow keys and press [ENTER] to apply setting.

1 st Level Major Items	2 nd Level Minor Items	3 rd Level Adjustment Values	Function Descriptions	
	IP Address	<u>192.168.100.100</u>	Press [ENTER] to be in modify mode; select the item to be modified using the up and down keys, and modify the value using the left and right keys or the numeric keys.	
	Subnet mask	<u>255.255.255.0</u>	Press [ENTER] to be in modify mode; select the item to be modified using the up and down keys, and modify the value using the left and right keys or the numeric keys.	
	Gateway	<u>192.168.100.254</u>	Press [ENTER] to be in modify mode; select the item to be modified using the up and down keys, and modify the value using the left and right keys or the numeric keys.	
	Audio In	<u>Line In</u> / Mic In	Set Audio In	
	Audio Enable	On / <u>Off</u>	Turn on/off audio output	
	Audio Volume	0~ <u>C</u> ~10	Audio Volume Setting	
	Audio Delay	On / <u>Off</u>	When the audio is not synchronized with the video, enable this function to set the audio delay time < Remark> Supported when NDI HX function setting is off	
Audio	Audio Delay Time(ms)	<u>-1</u> ~-500ms	Set audio delay time <remark> Supported when NDI HX function setting is off</remark>	
	Encode Type	<u>AAC</u> / G.711	Set audio encode type <remark></remark> Supported when NDI HX function setting is off	
	Encode Sample Rate	1. <u>48 KHz(AAC)</u> 2. 44.1 KHz(AAC) 3. 16 KHz(AAC) 4. 16 KHz(G.711) 5. 8 KHz(G.711)	Set the encode type and sample rate < Remark> Supported when NDI HX function setting is off	
	Prompt	On / <u>Off</u>	Turn on/off the prompt information on the display	
	IR Receive	<u>On</u> / Off	When it is Off, the remote control will not be able to control the camera. At this moment, turn off and then turn on the power to restore control of the remote control.	
	Tally Lamp	On / <u>Off</u>	Select to enable or disable Tally Lamp function.	
System	Tally CMMD Mode	General / <u>Link</u>	 Set whether the indicator light is linked with RS232 command General (Not linked): The indicator light switch and mode shall be set separately. When the indicator light is on and the default mode is off, additional command is required to set the indicator light mode Setting the indicator light mode when the indicator light is off will not trigger the indicator light 	

1 st Level Major Items	2 nd Level Minor Items	3 rd Level Adjustment Values	Function Descriptions
			 Link: When the indicator light is on, the default mode is red light Setting the indicator light mode when the indicator light is off will turn on the indicator light
	Language	<u>English</u> / Chinese	
	Initial Position	Last operated / First default position	Select the camera lens to return to the last operated position or the first default position after POWER ON <remark> First default position = Preset 0</remark>
	Control Device	Encoder / <u>Controller</u>	Control Device setting, Controller: for joystick Encoder: for tracking system
	Motionless Preset	On / <u>Off</u>	When the function is enabled, the screen will Freeze when Preset is executed. Freeze will be released after Preset is completed.
	Control Port	<u>RS-232</u> / RS-422	Choose whether the control interface used is RS-232 or RS-422
	Protocol	<u>VISCA</u> / Pelco D	
	Baud Rate	<u>9600</u> / 38400	Choose the transmission speed of the control signal
	VISCA Address	<u>0</u> ~7	The Protocol set to VISCA allows the camera ID address to be assigned. Select 0 for automation.
	PELCO D Address	<u>1</u> ~255	The Protocol set to Pelco D allows the camera ID address to be assigned.
	Genlock - Hor. Phase	500~ <u>C</u> ~-500	Set synchronized source parameters
	Output Mode	1. 3840x2160/59.94p 2. 3840x2160/50p 3. 3840x2160/29.97p 4. 3840x2160/25p 5. 1080p/59.94 6. 1080p/50 7. 1080p/29.97 8. 1080p/29.97 8. 1080p/25 9. 720p/59.94 10. 720p/50 11. 1080i/59.94 12. 1080i/50	Choose the output resolution
	Color Space	Standard Profile / REC.709/ BT.2020	Set the standard for color space
	Factory Reset	On / <u>Off</u>	Resume the factory default setting
Status			Display the current setting status

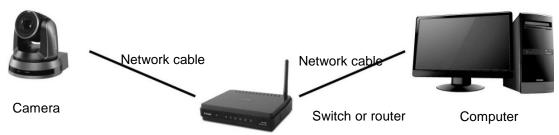

5.1 Connecting Camera to Network

5.1.1 Connecting to Internet

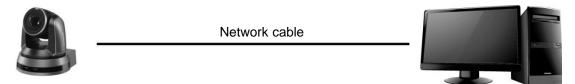

Two common connection methods are shown below

1. Connecting via switch or router

2. To connect directly through network cable, the IP address of the computer should be changed so that it is on the same network segment as the camera

E.g.: The factory-preset default IP address of the camera is 192.168.100.100. The computer IP address must be set with the same network segment, such as 192.168.100.101, so that the computer can be connected correctly with the camera

Camera

• Change network settings

eneral		
'ou can get IP settings assigned aut his capability. Otherwise, you need t he appropriate IP settings.		
O Obtain an IP address automatic	ally	
Use the following IP address:		
-	ally	
O Use the following IP address:		

Computer

5.1.2 Using the Browser to View the Images

- Open the browser, and enter the IP address of the camera in the address bar
 E.g.: <u>http://192.168.100.100</u> (default IP address)
- Enter administrator's account and password For the first-time login, please refer to <u>5.2.12 Settings - User</u> to change the default password

Lumens Network Camera

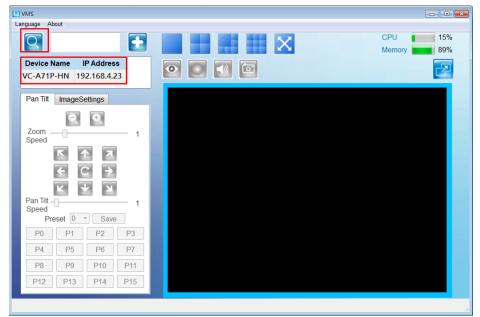

- Account: admin (Default)
- Password: 9999 (Default)

5.1.3 Using Lumens VMS Software to View the Images

<Remark> Supported when NDI|HX function is off (Please refer to <u>5.2.5 Streaming -</u> <u>NDI</u>)

- Open *LUMENS VMS* software (Please download from the Lumens official website)
- Search Camera: Press [automatically search for the device] button to locate the Camera
- Click camera in the list and start operation after connecting to network

<Note> When using automatic search, the camera and computer must be in the same network segment, e.g., 192.168.4.X

5.1.4 Using RTSP Player to View the Images

<Remark> To support this function, please turn off NDI|HX function (Please refer to <u>5.2.5 Streaming -</u><u>NDI</u>)

In addition to the browser and VMS, other free softwares also can be used for RTSP connection, such as VLC, Quick Time and PotPlayer

RTSP connection address formats are as follows:

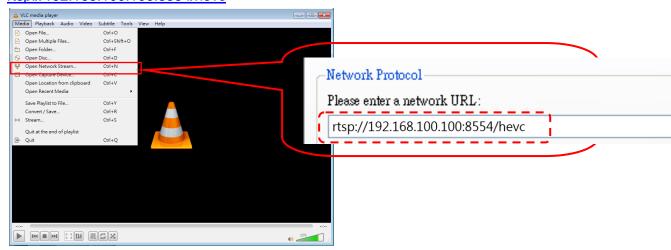

- RTSP Main Streaming (4K@H.265)=> rtsp://<u>camera IP</u>:8554/<u>hevc</u>
- RTSP Sub1 Streaming (1080P@H.264)=> rtsp://camera IP:8557/h264
- RTSP Sub2 Streaming (720P@H.264)=> rtsp://<u>camera IP</u>:8556/<u>h264</u>

If password authentication is enabled, the RTSP connection address is as follows:

- RTSP Main Streaming <u>rtsp://Username:Password@VC IP address:port/hevc</u>
- RTSP Sub1/ Sub2 Streaming <u>rtsp://Username:Password@VC IP address:port/h264</u>
- To enable password authentication function, please refer to <u>5.2.4 Stream</u>

Example:

Open the VLC software, click [Open Network Streaming], and enter the URL: rtsp://192.168.100.100:8554/hevc

5.1.5 Using NDI Studio Monitor to View the Images

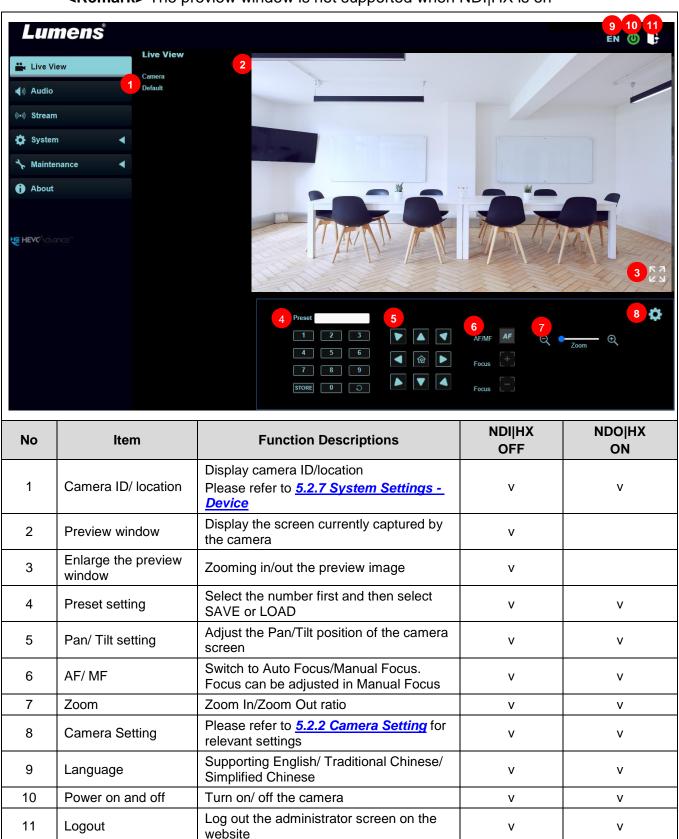

<Remark> To support this function, please turn on NDI|HX (Please refer to <u>5.2.5 Streaming - NDI</u>) For operation or description of NewTek, please visit the website <u>https://www.newtek.com/</u> NDI 4 Tool Download link <u>http://new.tk/NDIHX-Driver-Win</u>

Chapter 7 Troubleshooting

This chapter describes problems you may encounter while using VC-A71P-HN. If you have questions, please refer to related chapters and follow all the suggested solutions. If the problem still occurred, please contact your distributor or the service center.

No.	Problems	Solutions		
1.	Boot without power signal	 Make sure you have plugged in the power cord. When using a PoE connection, ensure that the power supply supports PoE++ (IEEE802.3bt) hubs 		
2.	There is no image output from VC-A71P-HN	 Check the power supply or PoE supply functions. Check the correct output source is selected by [System Setting] > [Output Setting] on the web page Streaming: HDMI + Streaming NDI: HDMI+NDI USB Output: HDMI + UVC Confirm whether the camera resolution can be used together with the monitor equipment If 4k output, confirm the monitor equipment supports 4K output Replace the cables and make sure they are not faulty. 		
3.	RS-232 cannot be controlled	 Confirm the connection is correct (RS-232 In/ Out) Please make sure the Baud rate setting is the same as the control equipment 		
4.	Whether the Internet can be used for operation	Please refer to <u>5.2.9 Settings- Network</u> for the Internet usage		
5.	The ONVIF software cannot find the machine	 Please make sure that [Setting]> [Video]> [Camera Location] on the web page uses only English letters or numbers. The ONVIF software cannot find the machine if you use special characters and space. Either NDI or ONVIF can be used. Please go to the [Setting] > [Video] > [NDI HX] on the web page to check if it is [Off]. 		
6.	Tally lamp is not working when applying RS232 setting	 Please make sure if the Tally lamp function is enabled from the setting menu or web page. Setting Menu: [System] > [Tally Lamp] Web page: [Setting] > [Camera] > [Tally Lamp] 		
7.	The camera does not save the relevant parameters (PTZ, AWB) after reboot	 Please make sure if the Initial Position is set to Last Operated Position from the setting menu or web page Setting Menu: [System] > [Initial Position] Web page: [Setting] > [Camera] > [Pan Tilt Zoom] 		
8. Chapter 8 Safety Instructions

Always follow these safety instructions when setting up and using the VC-A71P-HN PTZ Video Camera:

1 Operation

- 1.1 Please use the product in the recommended operating environment, away from water or source of heat
- 1.2 Do not place the product on a tilted or unstable trolley, stand or table.
- 1.3 Please clean the dust on the power plug prior to usage. Do not insert the product's power plug into a multiplug to prevent sparks or a fire.
- 1.4 Do not block the slots and openings in the case of the product. They provide ventilation and prevent the product from overheating.
- 1.5 Do not open or remove covers, otherwise it may expose you to dangerous voltages and other hazards. Refer all servicing to licensed service personnel.
- 1.6 Unplug the product from the wall outlet and refer servicing to licensed service personnel when the following situations happen:
 - If the power cords are damaged or frayed.
 - If liquid is spilled into the product or the product has been exposed to rain or water.

2 Installation

2.1 For security considerations, please make sure the standard mount you use is in line with UL or CE safety approbations and installed by technician personnel approved by agents.

3 Storage

- 3.1 Do not place the product where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- 3.2 Unplug this product during thunderstorms or if it is not going to be used for an extended period.
- 3.3 Do not place this product or accessories on top of vibrating equipment or heated objects.

4 Cleaning

4.1 Disconnect all the cables prior to cleaning and wipe the surface with a dry cloth. Do not use alcohol or volatile solvents for cleaning.

5 Batteries (for products or accessories with batteries)

- 5.1 When replacing batteries, please only use similar or the same type of batteries
- 5.2 When disposing of batteries or products, please adhere to the relevant instructions in your country or region for disposing of batteries or products

Precautions

This symbol indicates that this equipment may contain dangerous voltage which could cause electric shock. Do not remove the cover (or back). No user-serviceable parts inside. Refer servicing to licensed service personnel.

This symbol indicates that there are important operating and maintenance instructions in this User Manual with this unit.

FCC Warning

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

Notice :

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

本設備符合 FCC 規則第 15 部分的規定·本設備已經過測試·符合 A 類設備的限制。這些限制旨在為在商業環境操作設備提

供合理的保護,以防止有害干擾。

IC Warning

This digital apparatus does not exceed the Class A limits for radio noise emissions from digital apparatus as set out in the interference-causing equipment standard entitled "Digital Apparatus," ICES-003 of Industry Canada. Cet appareil numerique respecte les limites de bruits radioelectriques applicables aux appareils numeriques de Classe A prescrites dans la norme sur le material brouilleur: "Appareils Numeriques," NMB-003 edictee par l'Industrie.

EN55032 CE Warning

Operation of this equipment in a residential environment could cause radio interference.

警告:本設備在居住環境中使用可能會導致無線電干擾

Supplier's Declaration of Conformity 47 CFR § 2.1077 Compliance Information
